3. **ShoppingCart**
    - *Attributes:* `cartId: String`, `totalAmount: Double`
    - *Methods:* `addBook()`, `removeBook()`, `clearCart()`
4. **Order**
    - *Attributes:* `orderId: String`, `orderDate: Date`, `status: String`, `totalAmount: Double`
    - *Methods:* `createOrder()`, `cancelOrder()`, `updateStatus()`
5. **Payment**
    - *Attributes:* `paymentId: String`, `paymentDate: Date`, `amount: Double`, `paymentStatus: String`
    - *Methods:* `processPayment()`, `verifyPayment()`

Relationships and Multiplicities

- **Customer to ShoppingCart (1 to 1):** A customer owns exactly one shopping cart (`1..1`).
- **ShoppingCart to Book (1 to Many):** A shopping cart contains one or more books, and a book can belong to multiple shopping carts (`1..*`).
- **Customer to Order (1 to Many):** A customer can place zero or multiple orders, but an order belongs to exactly one customer (`0..*` to `1`).
- **Order to Payment (1 to 1):** An order is associated with exactly one payment transaction (`1..1`).
- **Order to Book (1 to Many):** An order consists of one or more ordered books (`1..*`).
